4. Dividend Philosophy

- Premium income received from the policyowner is invested in an investment portfolio to support the product groups determined by us according to the investment policy. The policyowners participate in the financial performance of the product group through the policy dividend declaration. The policy dividend declaration may be affected by both past experience and future outlook for all the factors including, but not limited to, the following:
 - Investment returns: include both interest earnings and any changes in the market value of the asset allocated to this product. Investment returns could be affected by fluctuations in interest income (both interest earnings and outlook of interest rate) and various market risks, including credit spread and default risk, fluctuations in equity price and currency price of the asset against the policy currency.
 - Surrender: include policy surrender, partial surrender and policy lapse experience; and the corresponding impact on investments.
 - Claims: include the cost of providing the death benefit and other insured benefits under the product.
 - Expenses: include both expenses directly related to the policy (e.g. commission, underwriting, issue and premium collection expenses) and indirect expenses allocated to the product group (e.g. general administrative costs).
- Future investment performances are unpredictable, and we aim to provide a more stable dividend payment. We may spread out the gains and losses in the financial performance in a particular year over a longer period of time aim to smooth out the short term volatility of dividend rates over the course of the policy term. When future investment performance is worse than expected, the company's shareholder may share less from the investment performance such that more may be allocated for dividend payment and vice versa.
- The Board, having regard to the advice of the Appointed Actuary and reviewed by Risk Committee which must include one independent non-executive director, will review and determine the dividend rate at least once a year. The declared dividend rate may be different from those illustrated in the relevant product information provided, e.g. benefit illustration. In case of any change in the actual dividend rate against the illustration or should there be a change in the projected future dividend rates, such changes will be reflected in the policy anniversary statement and the benefit summary.

5. Investment philosophy, policy and strategy

- Our investment policy aims to achieve the targeted long-term investment results and reduce volatility in investment returns over time. It also aims to control and diversity risk exposures, maintaining adequate liquidity and manage the assets with respect to the product features.
- Our current long-term target asset allocation attributed to this product is as follows:

Target Asset Mix	
Fixed income type assets (Investment grade)	Fixed income type assets (non-investment grade) / Equity-like assets
60%-90%	10%-40%

- Investment instruments include cash, deposits, sovereign bonds, corporate bonds, listed equities, funds or other investment products. Derivatives and other hedging instruments may be used to manage investment risk at the Company's decision based on its long-term market view and asset-liability positions. It should be noted that residual investment risk may still exist after hedging.
- The asset portfolio also targets to provide diversification across different geographic regions and industries to the extent the size of the portfolio can support. For fixed income investment, currency exposure of the underlying policies is mitigated by closely matching either through direct investments in the same currency denomination or the use of currency hedging instruments. Furthermore, the asset portfolio is actively managed by investment professionals, who will also closely monitor the investment performance.
- The investment strategy may be subject to change depending on the investment views and economic outlook. In case of any change in the investment strategy, we will inform our policyowners for any material changes, rationale for the change and any impact to the policyowners.

Insurance Policy Product Brochure Addendum -

I. Foreign Account Tax Compliance Act

Under the U.S. Foreign Account Tax Compliance Act (“FATCA”), a foreign financial institution (“FFI”) is required to report to the U.S. Internal Revenue Service (“IRS”) certain information on U.S. persons that hold accounts with that FFI outside the U.S. and to obtain their consent to the FFI passing that information to the IRS. An FFI which does not sign or agree to comply with the requirements of an agreement with the IRS (“FFI Agreement”) in respect of FATCA and/or who is not otherwise exempt from doing so (referred to as a “nonparticipating FFI”) will face a 30% withholding tax (“FATCA Withholding Tax”) on all “withholdable payments” (as defined under FATCA) derived from U.S. sources (initially including dividends, interest and certain derivative payments).

The U.S. and Hong Kong have agreed an inter-governmental agreement (“IGA”) to facilitate compliance by FFIs in Hong Kong with FATCA and which creates a framework for Hong Kong FFIs to rely on streamlined due diligence procedures to (i) identify U.S. indicia, (ii) seek consent for disclosure from its U.S. policyholders and (iii) report relevant tax information of those policyholders to the IRS.

FATCA applies to FTLife Insurance Company Limited (the “Company”) and this Policy. The Company is a participating FFI. The Company is committed to complying with FATCA. To do so, the Company requires you to:

- (i) provide to the Company certain information including, as applicable, your U.S. identification details (e.g. name, address, the US federal taxpayer identifying numbers, etc.); and
- (ii) consent to the Company reporting this information and your account information (such as account balances, interest and dividend income and withdrawals) to the IRS.

If you fail to comply with these obligations (being a “Non-Compliant Accountholder”), the Company is required to report “aggregate information” of account balances, payment amounts and number of non-consenting US accounts to IRS.

The Company could, in certain circumstances, be required to impose FATCA Withholding Tax on payments made to, or which it makes from, your policy. Currently the only circumstances in which the Company may be required to do so are:

- (i) if the Inland Revenue Department of Hong Kong fails to exchange information with the IRS under IGA (and the relevant tax information exchange agreement between Hong Kong and the U.S.), in which case the Company may be required to deduct and withhold FATCA Withholding Tax on withholdable payments made to your policy and remit this to the IRS; and
- (ii) if you are (or any other account holder is) a nonparticipating FFI, in which case the Company may be required to deduct and withhold FATCA Withholding Tax on withholdable payments made to your policy and remit this to the IRS.

You should seek independent professional advice on the impact FATCA may have on you or your policy.

II. Common Reporting Standard

Hong Kong has put in place a framework implementing the Automatic Exchange of Financial Account Information (“AEOI”) which allows for the exchange of financial information among tax authorities. The Company, as a reporting financial institution under the law, is required to collect and provide certain information of policyholders and beneficiaries to the Inland Revenue Department of the Hong Kong Special Administrative Region which exchanges such information with tax authorities of another jurisdiction or jurisdictions which has/have signed an AEOI agreement with Hong Kong and of which the policyholders and beneficiaries may be resident for tax purposes. Where a policyholder or beneficiary fails to provide any requested information, the Company reserves the right to take any action as it deems necessary in order for it to comply with the law.
