

# Allianz European Equity Dividend

31/12/2016

- The Fund is exposed to significant risks which include investment/general market, country, European country and company-specific risks. The economic and financial difficulties in Europe may get worse and thus may adversely affect the Fund (such as increased volatility, liquidity and currency risks associated with investments in Europe).
- The Fund may invest in financial derivative instruments ("FDI") for efficient portfolio management (including for hedging) which may expose to higher counterparty, liquidity and market risks. The Fund will not invest extensively in FDI for investment purpose.
- Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

3 Source: Benchmark, the fund award is based on quantitative analysis of the performance and risk management of their past 12 months, 3 and 5 years. The fund award is based on fund performance as at 30 September 2014.

4 Dividend payments are applicable for Class A Dis (annual distribution) and for Class AM Dis (monthly distribution) and for reference only. Yields are not guaranteed, dividend may be paid out from capital (Class A/AM). This may result in an immediate decrease in the NAV per share and may reduce the capital available for the Fund for future investment and capital growth. Positive distribution yield does not imply positive return.

5 Annualised Dividend Yield = Dividend Per Share / Ex-Dividend Date NAV

6 Annualised Dividend Yield =  $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^n - 1] \times 100$ . The annualised dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed.

7 The Fund Size quoted includes all share classes of the Fund.

8 The All-in-Fee includes the expenses previously called management and administration fees.

9 Total Expense Ratio (TER): Total cost (except transaction costs) charged to the Fund during the last financial year (as at 30/09/2016) expressed as a ratio of the Fund's average NAV. For share classes that have been incepted for less than one year as at close of the last financial year (please refer to the Inception Date in the Fund Details table), the TER will be annualised. For share classes incepted after the close of the last financial year, the TER will be reflected as N/A.

10 Performance is calculated from inception of the fund until the end of that calendar year.
