30/09/2017

- The Fund is exposed to significant risks which include investment/general market, company-specific, creditworthiness/credit rating/downgrading, default, currency, valuation, asset allocation, country and region, emerging market and interest rate risks. The Fund's investments focus on US and Canada which may increase concentration risk.
- The Fund is also exposed to risks relating to securities lending transactions, repurchase agreements and reverse repurchase agreements.
- The Fund may invest in high-yield (non-investment grade and unrated) investments and convertible bonds which may subject to higher risks, such as volatility, loss of principal and interest, creditworthiness and downgrading, default, interest rate, general market and liquidity risks and therefore may adversely impact the net asset value of the Fund. Convertibles will be exposed to prepayment risk, equity movement and greater volatility than straight bond investments.
- The Fund may invest in financial derivative instruments ("FDI") for efficient portfolio management (including for hedging) which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund will not invest extensively in FDI for investment purpose.
- Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Opportunities¹¹Risks¹¹

Attractive potential returns of equities with other equity securities (ie. covered call, short-call option), high-yield bonds and convertible bonds	Equities and other equities securities (ie. covered call, short-call option), high-yield bonds and convertible bonds may be subject to volatility and loss risks. The volatility of the fund unit price may be strongly increased
Equities with covered call strategies pair a long position with a short-call option on the same stock generate premium and provide upside potential. It may also reduce exposure to equity market volatility	The Fund may tactically use a covered call option strategy. This strategy may cause the Fund to forego any appreciation in the underlying instrument's stock price above the option strike price, and so limits the growth potential of the Fund. Equity may fall more than the respective call premium, resulting in the losses of premium cushions on equity holdings
Investments specifically in the U.S. capital market	Underperformance of the U.S. capital market possible
Currency gains possible against investor currency in unit classes not hedged	Currency losses possible against investor currency in unit classes not hedged
Flexible investment policy permits better use of opportunities	Flexible investment policy is no guarantee that losses will be excluded
Broad diversification across numerous securities	Limited participation in the potential of individual securities
Potential additional returns from security analysis and active management	Success of single security analysis and active management not guaranteed
	Any distributions involving payment of distributions out of the Fund's capital may result in an immediate decrease in the Net Asset Value per Share and may reduce the capital available for the Fund for future investment and capital growth

3 Source: Benchmark, the house award is based on analysis of the quantitative data and qualitative factors of the company's overall capabilities. The award is based on the reference data as at 30 September 2014.

4 Performance is calculated from inception of the fund until the end of that calendar year.

5 Securities may be held directly or indirectly via other investment vehicles.

6 Dividend payments are applicable for Class AM Dis (monthly distribution) and for reference only. Yields are not guaranteed, dividend may be paid out from capital (Class AM). This may result in an immediate decrease in the NAV per share and may reduce the capital available for the Fund for future investment and capital growth. Positive distribution yield does not imply positive return.

7 Annualised Dividend Yield = $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^{12} - 1] \times 100$. The annualised dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed.
