

BNP PARIBAS A FUND European Multi-Asset Income

• The fund seeks to provide regular income in the form of dividend and to generate capital growth by investing in different asset classes in Europe including equities, real estate securities, corporate bonds, high-yield bonds, government bonds and convertible bonds.

• The fund has significant equity exposure to a geographical region (Europe) and is likely to be subject to a greater concentration risk and higher volatility than a more diversified investment. Risks of equity market may include significant fluctuations in prices, negative information about the issuer or market. Fluctuations are often amplified in the short term. Further, investments in real estate securities (including REITs) may be subject to similar risks as direct investment in real estate including possible decline in the value of real estate, risks related to general and local economic conditions, increase in interest rates and other real estate capital market influences.

• The fund may invest in bonds (including sovereign debt) and is exposed to interest rate and credit risks. Governments largely in-debt may not be able to repay the principal and/or interest in accordance with the terms of such debt. The fund may invest in non-investment grade or unrated debt securities, which may expose the fund to higher credit/default risk and volatility.

• The management company may at its discretion pay dividends out of the capital of the fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the fund's capital may result in an immediate reduction of the NAV per share.

• The monthly distribution share classes will continue to distribute monthly dividends in periods when the fund has negative return, which will further reduce the NAV of the fund.

• Investors should not solely rely on this document to make any investment decision. Please refer to the Hong Kong offering document for further information (including the risk factors) about the fund.

INVESTMENT STRATEGY

The Fund seeks primarily to provide regular income in the form of dividend and, on a secondary basis, to generate capital growth by investing in different asset classes in Europe including European equities, European real estate securities, European corporate bonds, European high-yield bonds, European government bonds, European convertible bonds and cash instruments.
