1. The Fund may be subject to risks, such as investment, equities, currency and Eurozone sovereign debt crisis risks. The Fund invests primarily in European markets and is subject to higher concentration risk than funds following a more diversified policy, and investment in smaller companies tends to be subject to greater risks than larger companies, which include liquidity risks, economic and organisational risks and regulatory risks.
2. The Fund may invest in derivatives for investment or hedging purposes. Such investments may result in higher volatility or a significant loss in the Fund's assets within a short period of time.
3. Investors may suffer substantial loss of their investments in the Fund.

Investment Objectives¹

The investment objective of the Trust is to achieve long term capital growth by investing directly (and, where appropriate, indirectly) in securities of European companies. The Managers' policy is to seek growth predominantly through investment in securities of carefully selected companies quoted on the principal European Stock Markets whilst retaining the flexibility to invest in smaller growth companies or "niche" opportunities should the opportunity arise.
