47	Statement of Changes in Net Assets attributable to Holders of Redeemable Participating Shares 31 July 2016		

Investment Policy and Description of Series

Investment Objectives and Policies

Invesco Asian Equity Fund (the "Fund") aims to achieve long-term capital growth by investing in a portfolio of equity or equity related instruments of companies with exposure to Asian countries. At least 70% of the Net Asset Value ("NAV") of the Fund shall be invested in equity and equity related securities issued by (i) companies and other entities with their registered office in an Asian country, (ii) companies and other entities with their registered office outside of Asia but carrying out their business activities predominantly in one or more Asian countries or (iii) holding companies, the interests of which are predominantly invested in companies with their registered office in an Asian country. Up to 30% of the NAV of the Fund may be invested in aggregate in cash and cash equivalents, money market instruments, equity and equity related instruments issued by companies or other entities not meeting the above requirement or debt securities (including convertible debt) of Asian issuers. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco Continental European Equity Fund (the "Fund") aims to achieve capital growth by investing in securities of Continental European companies. At least 70% of the NAV of the Fund (after deducting ancillary liquid assets) shall be invested in equity securities issued by (i) companies having their registered office in a Continental European country, (ii) companies with registered office outside Continental Europe carrying out their business activities principally in Continental Europe, or (iii) holding companies, the interests of which are principally invested in subsidiary companies with a registered office in Continental European countries. Up to 30% of the NAV of the Fund (after deducting ancillary liquid assets) may be invested in debt securities (including convertible debt) issued by the above companies or in equity or debt securities of companies carrying out business in Continental Europe without meeting the above requirements. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco Global Select Equity Fund (the "Fund") aims to achieve capital growth in international securities. The Manager will invest mainly in shares of companies quoted on the world's stock markets, although it may include other investments that the Manager considers appropriate.

Invesco Japanese Equity Core Fund (the "Fund") aims to achieve capital growth in Japan. The Manager will invest mainly in shares of companies organised under the laws of Japan, although it may include shares of companies organised elsewhere which derive revenues from or have substantial interests in Japan as the Manager considers appropriate. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco UK Equity Fund (the "Fund") aims to achieve capital growth by investing in securities of UK companies. The Manager will invest at least 70% of the NAV of the Fund (after deducting ancillary liquid assets) in equity securities issued by (i) companies having their registered office in the UK, (ii) companies and other entities located outside the UK carrying out their business activities principally in the UK, or (iii) holding companies, the interests of which are principally invested in subsidiary companies with a registered office in the UK. Up to 30% of the NAV of the Fund (after deducting ancillary liquid assets) may be invested in equity or debt securities issued by companies carrying out business in the UK without meeting the above requirements. The Fund will invest in securities listed or traded on Recognised Markets.

Invesco Global Real Estate Securities Fund (the "Fund") aims to achieve long-term capital growth together with income. The Fund seeks to achieve its objective by investing primarily in a diversified portfolio of global equity (including Real Estate Investment Trusts ("REITs")), preference shares and debt securities, issued by companies and other entities which derive their revenues from activities related to real estate. The Fund's exposure to US REITs will be primarily to US commercial real estate. Debt securities will have an underlying exposure to, or will be secured by, mortgages or similar instruments and will have a credit rating of investment grade or higher as rated by Standard & Poor's (S&P) or equivalent.

Up to 30% of the NAV of the Fund may be invested in equity or debt securities, which do not meet the above requirements, but are issued by companies and other entities which have a substantial exposure to the real estate market or government debt securities with a credit rating of AAA as rated by S&P or equivalent. Less than 30% of the NAV of the Fund may be invested in debt securities and no more than 10% of the NAV of the Fund may be invested in debt securities rated below investment grade. Up to 20% of the NAV of the Fund may be invested in cash, cash equivalents and money market instruments.

Investment Policy and Description of Series (continued)

Description of the Series

The Invesco Funds Series (the "Series") is an open ended umbrella Fund constituted as an Irish unit trust comprising Invesco Asian Equity Fund, Invesco Continental European Equity Fund, Invesco Global Select Equity Fund, Invesco Japanese Equity Core Fund, Invesco UK Equity Fund and Invesco Global Real Estate Securities Fund (the "Funds"). The Series is authorised by the Central Bank of Ireland (the "Central Bank") as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"). The Series is also authorised by the Hong Kong Securities and Futures Commission (SFC) under the Hong Kong Securities and Futures Ordinance (Cap. 571) and has been recognised by the Financial Conduct Authority under Section 264 of the Financial Services and Markets Act 2000 (the "Act").

The Funds also endeavour to comply with regulatory standards of the other jurisdictions where the Funds are authorised for distribution.

The Funds issue units to unitholders. As per the Consolidated Prospectus, these units are referred to as "Shares" and the unitholder is referred to as the "Shareholder" throughout these Financial Statements.

Each Fund is a fund in the Invesco range of Funds managed by Invesco Global Asset Management DAC, (the "Manager"). Invesco Global Asset Management DAC is an indirect wholly-owned subsidiary of Invesco Ltd.

Each Fund is approved by the Central Bank of Ireland. The Funds except Invesco Global Select Equity Fund are approved by the Securities and Futures Commission ("SFC"). In giving authorisation for the Fund the SFC does not take responsibility for the financial soundness of a Fund nor for the correctness of any statements made or opinions expressed in this regard.

The Funds are not registered under the United States Investment Company Act of 1940 (as amended) and its Shares have not been registered under the United States Securities Act of 1933 (as amended). Accordingly, Shares may not be offered, sold or delivered in the United States or to US Persons as defined in the current Prospectus of the Funds.

The contents of this report, for which the Directors of the Manager are responsible, have been approved by Invesco Global Asset Management DAC, which is regulated by the Central Bank of Ireland.

Share prices are available through Invesco's internet site www.invesco.com (for Shareholders in Hong Kong, please refer to www.invesco.com.hk) and if required by local law or regulation, published in local leading financial newspapers including, in the case of Hong Kong, the Hong Kong Economic Times, the South China Morning Post and the Hong Kong Economic Journal. Share prices are currently also available from Reuters and Bloomberg.

Any investment in the Funds should be considered long term. There can be no guarantee that the amounts subscribed for in shares will be ultimately realised. Changes in rates of exchange between currencies may cause the value of an investment in the Funds of the Series to diminish or increase. Investors should be aware that investment in emerging markets is by its nature both high risk and potentially volatile.

This report to Shareholders does not constitute an offer or invitation to purchase Shares in any of the Funds. Applications for the purchase of Shares may only be made on the basis of the current Prospectus.

An updated Consolidated Prospectus for Invesco Fund Series and Invesco Fund Series 1, 2, 3, 4, 5, 6 was issued on 15 February 2017. This contains all current and relevant information (as at the date of issue) regarding the Series and other Funds within the Invesco Fund Series 1, 2, 3, 4, 5 and 6. This report to Shareholders has been prepared on the basis of the Prospectus. If you wish to receive a copy of this Prospectus please contact any Invesco office. Refer to note 11 for details of changes in the updated Consolidated Prospectus.

** Launched on 23 February 2017.

Distribution Frequency

^{AA} = Annual

^A = Accumulating

***Effective 10 May 2017 actual annual administration fee was reduced by 10 basis points. Refer to note 11 for further details.

The Manager's fee is based on the daily net asset value ("NAV") of each Fund and is paid monthly. The Manager will also be paid a fee in respect of its duties as Administrator and Registrar for each Fund. The administration fee will be calculated daily and will be paid monthly on the last Business Day of each month at the rates set out in the table above based on the net asset value of each share class of each Fund on each Business Day.

The Manager may pay a portion of its administration fees to the Sub-Administrator ("BNY Mellon Fund Services (Ireland) Designated Activity Company") in consideration for the sub-administrator providing certain administration functions to the Funds.

The Depositary ("BNY Mellon Trust Company (Ireland) Limited") will be paid a fee calculated on a sliding scale to a maximum rate of 0.0075% per annum of the net asset value of each class of each share of the Funds on the last business day of the month and paid monthly.

The assets of a Fund are exclusively available to satisfy the rights of Shareholders in relation to that Fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of that Fund.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's A Shares returned 22.71% compared to the 21.83% return of the benchmark MSCI AC Asia ex Japan Index. This placed the Fund in the first quartile of its peer group, the Morningstar GIFS Asia ex Japan sector, which returned on average 19.3%. The Fund is also first quartile over five years.

The positive performance of the Fund was attributable to stock selection across the financials and the Chinese internet companies. In particular, Korea Investment Holdings was a notable contributor as investors sought out companies with leverage to a rising Korean stock market, while the Indian mortgage provider, Housing Development Finance benefited from strong loan growth and government measures to promote home ownership. We believe this company's long term prospects remain attractive as the mortgage market in India is still very underpenetrated. Elsewhere, among the Chinese internet companies, NetEase, added value as its strong game pipeline helping ease concerns over earnings growth sustainability. Other contributors included the agrochemical company, UPL, which continued to perform well as the market has become more convinced in its ability to sustain mid-teen earnings growth.

Conversely, some of the Chinese internet companies' strong performance was offset by the Fund's underweight exposure to Alibaba Group which benefitted from solid results and positive guidance. Elsewhere, Korea Electric Power underperformed due to concerns about higher coal prices, lower nuclear utilisation and a temporary halt to the construction of two nuclear reactors. Concerns about the government's commitment to coal and nuclear power remain, however, we believe Korea Electric Power will be careful to any government plans and should be rewarded with a higher ROIC than the market is assuming.

We seek to invest in companies whose share prices are substantially below our estimate of fair value. The Fund continues to have significant exposure to the IT sector through Chinese internet companies as well as dominant Korean and Taiwanese companies. Over the review period, we have taken some profits from recent outperformers such as NetEase.

Elsewhere, South Korea has historically been one of Asia's most cheaply rated markets, partly due to its higher representation of cyclical stocks but also because of its weak corporate governance. The Fund's overweight position in South Korea relative to the benchmark reflects our belief that this valuation discount should start to narrow. Over the quarter, we introduced a holding in a Korean chemical company, whose investment in battery technology is undervalued in our opinion.

Meanwhile, we remain focused on heavily cash-backed businesses with strong free cash flow. As such, we added a holding in a leading Taiwanese semiconductor design company, Mediatek, which has been out of favour due to increased competitive intensity, although we expect these pressures to subside over the medium-term. Also in Taiwan, we introduced a new position in a notebook manufacturer, whose notebook/wearables business is starting to see a pick-up in demand after a period of decline, while the company is guiding for its high margin server business to deliver high-teens growth over the next year or two. We believe this should support an attractive and sustainable dividend yield.

Elsewhere, we also added a new position in a Chinese oil company, CNOOC, as we believe management's focus on profitability and asset returns is not reflected in the share price. Furthermore, we believe this company's oil reserves are being underappreciated by the market.

Asian equity markets have recovered strongly from their early-2016 lows, underpinned by a cyclical upturn in corporate earnings and the more robust global economic backdrop. Valuations are now less attractive than before, and if recent performance is to be sustained current earnings growth estimates of around 20% for 2017 may need to be realised. This is not unreasonable given the cyclical upturn, but it may prove a stretch if this year's political events lead to a disruption in consumer and corporate confidence. Aside from positive earnings momentum, other reasons for strong Asian markets have been: an ongoing low interest rate environment globally, and attractive valuations relative to other asset classes. Neither of these factors appears likely to change meaningfully in the near-term.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's A Shares returned 8.62% in the 6 months ending 31 July 2017, while the FTSE World Europe ex-UK Index benchmark returned 9.75%, and the GIFS Europe ex-UK Large Cap Equity sector averaged a return of 8.46%, placing the Fund in the second quartile of its peer group.

(all performance figures are in EUR, Total Return terms).

European equity markets rose in the period under review as the economy continued to show an increasingly sustainable and broad-based upturn. Unemployment in the eurozone dropped to 9.1% from 9.6% at the start of the year, and private sector activity surveys continued to signal expansion across various segments of the economy. European equities were also supported by an improved political backdrop, after the election results in France and the Netherlands were perceived as market friendly. Meanwhile, inflation remained relatively subdued amid a continued drag from energy prices.

The financials sector was the largest outperformer during this period thanks to good stock picking and an overweight position relative to the benchmark. A Spanish bank led the sector after posting strong earnings and raising its end of year profitability forecasts. The industrials sector was also a top contributor to relative performance owing to good stock selection. However, these benefits were outweighed by drags from the oil & gas sector, given weaker oil prices. Despite the short-term drag, our investment perspective has not altered; integrated oil companies we focus on have better capital allocation manifested in reduced capital and operational expenditures, which should lower cash-flow breakevens and support dividends. The telecommunications sector also placed a drag on relative returns during this period.

In portfolio activity terms, the Fund's exposure to the health care sector was raised, easing the underweight position relative to the benchmark. A new holding was started in a German-based global leader in the dialysis segment, encouraged by what we viewed as good fundamentals and growth prospects. We also added exposure to the industrials sector, taking advantage of what we saw as attractive valuation opportunities. Meanwhile, the Fund's weighting in the consumer goods sector was reduced. We sold out of a German carmaker as a combination of already high margins along with structural industry challenges made us seek better opportunities elsewhere. At period-end, oil & gas remained the largest overweight and consumer goods the biggest underweight sector relative to the benchmark.

We maintain a constructive view on European equity markets. This view is supported by a robust and improving macroeconomic backdrop in the region, valuations which to us remain very attractive in certain sectors and receding political risks.

On the earnings front, unlike previous years, European corporates have been reporting healthy earnings growth levels this year. We expect this trend to continue further, amid an accelerating activity momentum and supported by operational leverage.

Given the strengthening growth indicators in Europe, some investors anticipate that a wind-down of the quantitative easing programme is in sight. This would mean the beginning of normalisation in monetary policy in our view, so actually we would look at this event in a constructive way. We believe this would be helpful to some areas we are exposed to such as European financials and some other sectors which have been impacted by the low growth environment and deflationary fears in recent years, while we believe this would weigh on sectors with bond-like characteristics, which the Fund is less exposed to relative to the market.

Our investment process continues to be driven by fundamental stock-picking, combining both top-down and bottom-up analysis, and with a focus on valuation. We follow a disciplined investment approach, founded on active and long-term investing.

Investment Adviser's Report on behalf of the Manager

Market and economic review

Over the 6 months to the end of July 2017, the Fund's A Shares returned 12.41%, compared to the MSCI AC World Index, which returned 11.54% (net total return, US Dollar). During the period, the Fund was placed in the second quartile of its peer group, the GIF OS Global Large-Cap Blend Equity sector, which returned 11.60%.

Global equity markets reached all-time highs in July after more than \$10 trillion was added to their value in the first half of the year (source: Bloomberg, as at 17 July 2017). Investor appetite for risk remained robust with tolerance across many different asset classes at a three-year high, based on measures of volatility, and in line with levels seen before the 2008 global financial crisis (source Citigroup/Bloomberg, as at 17 July 2017). Economic data largely supported the global growth story over the six months. Yet potential headwinds remain. There was the surprise outcome of the election in the UK in June as Brexit negotiations got under way, and forthcoming elections in Germany and Italy. Meanwhile in the US President Trump's ability to implement spending and tax-cut plans is far from certain.

Strong fund performance was largely due to its exposure to IT, industrials and financial stocks. Within IT, Paypal, Nokia, Cap Gemini and Nexon were all among the top individual performers: Paypal's share price saw strong gains after the company's first quarter report which showed solid user growth and increased transactions on its platform; Nokia's share price jumped after it settled litigation with Apple and agreed on wider cooperation; Cap Gemini's share price benefited from revenue growth driven by strong momentum in Europe and an improved performance in North America; and Japanese online games developer Nexon saw its share price increase after revenue growth driven by gains in paying users in China.

The industrials sector experienced a boost from airlines in particular with the share price of both EasyJet and International Consolidated Airlines rising on increased profit expectations.

The financial sector performed strongly after the US Federal Reserve determined that all 34 big banks had sufficiently strong enough capital positions to significantly increase buyback and dividends in the annual Comprehensive Capital Analysis and Review (the first time in seven years that all banks had been cleared). Within the Portfolio, Citigroup doubled its dividend and approved a \$15bn buyback. In contrast, energy stocks remained under pressure on concerns that a global supply glut would persist.

The Fund is entirely driven by stock selection, seeking the best investment ideas from anywhere in the world. The Fund has a core of what we believe are sustainable growth, cash-generative names, and companies with a strong aftermarket or services element which supports earnings stability. The Fund also has a number of turnaround and special situation investments which we believe the market is mis-pricing.

As markets continue to perform well globally, compelling valuation opportunities remain at a premium. At a sector level, energy, autos and increasingly non-food retail trade cheap relative to the rest of the market. However all three face meaningful headwinds: a stagnant oil price, a peaking in US/ Chinese auto sales and the structural shift from physical stores to ecommerce within retail. As such, strong fundamental research, at a stock level, is important to avoid potential value traps. We continue to have significant exposure to financials as strong performance over the last year has been in conjunction with improved company performance, meaning valuations still remain attractive. We remain underweight the more defensive parts of the market, particularly consumer staples and utilities where valuations aren't attractive relative to the growth potential on offer.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's A Shares returned 4.29% over the 6 months to the end of July 2017, compared to the 7.59% return of the benchmark Topix Index. This placed the Fund in the fourth quartile of its peer group, the Morningstar Japan Large Cap Equity sector, which returned on average 7.5%. Over longer time periods the Fund is third quartile over 1 and 3 years and first quartile over 5.

Japan's equity market ended the period higher supported by strong corporate earnings and dividend growth. Japan's economy is on a moderate recovery trend, with generally upbeat economic data and a virtuous cycle unfolding between gradually rising incomes and consumer spending, supported by labour market tightness. However, positive momentum has been tempered by concerns over the strength of support for Prime Minister Abe, geopolitical tensions on the Korean peninsula and some yen appreciation.

Fund performance lagged that of the benchmark, in part due to stock selection in the IT and financial sectors. Konica Minolta was the biggest detractor amidst concerns that earnings may miss expectations due to tough competition in core office equipment. In financials, holdings in major banks underperformed as conservative earnings forecasts suggested limited near term growth potential. However, we believe any improvement in the outlook for growth and inflation will likely have a strong positive impact on banks' valuations. Elsewhere, Honda Motor underperformed, despite solid first quarter earnings, as data from the US suggested a slowdown in auto sales. Inpex was impacted by oil price weakness and delays to the start of its LNG field in Australia, although we believe pumping will begin next year, which should boost earnings, cashflow and dividends.

On the other hand, holdings in electric power utilities added value, benefiting from good earnings results and reduced uncertainty over the restarting of nuclear reactors, which has raised expectations for profit growth this year. Stock selection in industrials contributed positively, particularly bearings manufacturer NTN which reported better than expected earnings thanks to strong sales in China. Casio also made good gains buoyed by the strength of its watch business, while a successful restructuring of its underperforming camera business should support an earnings recovery, in our view.

There are a number of reasons for remaining optimistic on the near-term outlook for Japan's economy. China's economy has delivered a period of general stability; the US remains relatively robust; and a more stable yen should give a boost to the performance of Japanese exporters. Against this backdrop, it is increasingly likely that we will see some improvement in corporate earnings. Looking further ahead, we find that the outlook is less clear. Although the domestic economy is currently stable, sustainable inflation remains elusive and the potential introduction of protectionist trade policies by the US administration could be a risk for global trade. In this environment it remains important to closely monitor the external environment, given Japan's sensitivity to global economic trends.

The Fund has exposure to both yen sensitive cyclicals as well as some domestic staples, with significant positions in banks, real estate, oil companies and utilities. There have been a few changes to fund positioning over the period. We have taken some profits in recent outperformers, and reduced exposure in areas where we believe growth potential has become less clear. In turn, there has been a shift in the Fund towards those areas of the market where we see the best earnings momentum. At this time those areas also happen to be where we are able to find the most attractive valuations, which stands in marked contrast to more growth oriented areas of the market where we believe valuations in some cases look stretched. New holdings include: discount store operator Don Quijote and W-Scope, a manufacturer of separator film for lithium-ion batteries.

Investment Adviser's Report on behalf of the Manager

Market and economic review

The Fund's A Shares rose in value by 7.12% during the 6 months to 31 July 2017, compared with a rise of 7.09% by the FTSE All-Share Index. This placed the Fund in the second quartile of its peer group, the IA UK All Companies Sector, which rose by an average of 8.0%.

The first quarter of 2017 saw a continuation of themes running from the middle of 2016 - namely the vote for Brexit, the collapse in sterling and the election of Donald Trump as US President - which provided impetus for the market's move higher. Into the second quarter, however, the rally in sterling muted market performance, which in turn led to some rotation back towards UK domestic stocks.

In aggregate, the market continued to rise against a backdrop of global monetary tightening, but political events continued to dominate sentiment. The market sold off in response to Prime Minister Theresa May's call for a snap general election, before recovering strongly alongside European equity markets following Emmanuel Macron's victory in the French presidential election. UK equities looked set for further turbulence following the surprise outcome of the general election; sterling fell on news of the result, putting pressure on the share prices of companies perceived to be closely correlated with the UK economy. This resulted in some divergence in the performance of internationally-exposed companies relative to more domestically-oriented businesses. These moves were, however, noticeably less violent than those seen post-Brexit and followed some recovery of domestic stocks year-to-date.

The Fund's holdings in the financial sector were among the top contributors to performance; general insurer esure Group rose strongly, despite the recent 2 per cent hike in the rate of insurance premium tax, as the market priced in expectations of further increases in premiums. Legal & General reported a 16 per cent rise in profits for the full year 2016, supported by bulk annuity sales in its retirement division.

Elsewhere, news that thread maker Coats Group had settled a long-running dispute over its defined benefit pension obligations was well received by the market. IAG reported a record first quarter, traditionally its weakest period, as improvements in passenger unit revenues continued.

Weighing on fund performance were fund holdings in the oil & gas and mining sectors, notably BP, Total and First Quantum, which were negatively impacted by volatile oil and commodity prices. Pharmaceutical holding Vernalis saw its share price fall as it issued a disappointing update on the roll out of cough and cold treatment Tuzistra XR.

The Fund Manager believes that a significant rally in sterling from current levels could prompt some downside in the headline level of the index, but expects continued political uncertainty to restrain significant near-term recovery. In line with his view on sterling, the Fund Manager has identified a number of long-term value opportunities in domestic companies with exposure to specific pockets of the wider UK recovery story.

The Fund's largest sector weighting continues to be integrated oils, a reflection of the Fund Manager's view on the work undertaken by oil majors to drive down costs. Given the extent of progress that's already been made in the oil company business models, he believes that the outlook is no longer dependent on improving oil prices, but rather, the market's confidence in these companies' ability to cover their cash flow and dividends.

Investment Adviser's Report on behalf of the Manager

Market and economic review

During the six months to 31 July 2017, the Fund's A Shares delivered a return of 6.09% (US\$, total return). This placed the Fund in the third quartile of its peer group, the GIF OS Property - Indirect Global, which increased by an average of 6.67%. The Portfolio underperformed its benchmark in the period. Both security selection and market allocation proved negative to relative performance in the period. Absolute performance in the period was positive. Key positive contributions to relative performance were made by security selection in UK, Sweden and the US. Stock selection in Japan and a small cash holding were the greatest detractors from relative performance in the period. While recognizing the need to maintain attractive yield characteristics in an income starved world, the Portfolio maintains a bias toward companies with higher quality assets, supply constrained real estate market exposure, generally lower leveraged balance sheets and most importantly, to opportunities that can deliver above average earnings growth. The Portfolio is unlikely to show material active overweight exposure to individual countries or currencies in reflection of the unpredictable macro-environment. Instead, risk will continue to be allocated to specific stock opportunities where there is a belief that attractive relative value exists. Within the broader investment context, the cashflow security, fundamentally driven earnings growth opportunity and tangible asset nature of real estate appears to offer relative attraction to a diversified investor.

The global economy is exhibiting sustained and stable growth. However, such conditions inevitably raise questions about when and how central banks across the globe may begin to reverse their stimulative monetary policies. The Federal Reserve raised the Fed funds rate in June, as expected, and its forward-looking commentary suggests a continued inclination toward tighter monetary policy. In Continental Europe, materially improved economic data and confidence surveys have raised the prospect that the European Central Bank may begin to reduce its quantitative easing. German bond yields rose sharply at the end of the period. The UK's general election outcome, in which no party won a majority, added further uncertainty to the already uncertain political environment. In Asia, export activity has supported sustained Japanese growth, while continued stabilization in the Chinese economy has reduced concern about capital flight. Among listed real estate, Continental European real estate investment trusts (REITs) led absolute performance during the period. Mergers and acquisitions activity provided a boost during the period, reflecting wider investment appetite and competition for built assets, as well as the valuation opportunities evident among listed real estate companies.

Listed real estate companies are generally maintaining financial discipline. They are combining new equity and debt where accretive acquisitions can be made and recycling capital from lower returning assets into any higher returning development opportunities or reducing leverage where investment cycles are maturing.

Moderate levels of development activity are being undertaken by appropriately skilled management teams that have exposure to under-supplied real estate markets. The Portfolio continues to seek to capture the value creation being achieved by listed companies who are actively supplying new assets into markets where there is clear tenant demand.

Notes to the Financial Statements

For the six months ended 31 July 2017

1. Significant Accounting Policies

(a) Basis of Preparation

The condensed financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

These condensed financial statements have been prepared in accordance with accounting standards generally accepted in Ireland (Irish GAAP) including Financial Reporting Standard ("FRS") 104 "Interim Financial Reporting" and the European Communities (UCITS) Regulations, 2011, (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (UCITSs) Regulations 2015 (the "Central Bank FICITS Regulations"). These condensed financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the annual financial statements for the year ended 31 January 2017, which have been prepared in accordance with accounting standards generally accepted in Ireland.

Investments

The Funds classify their investments in transferable securities and money market instruments as financial assets at fair value through profit or loss. For the purpose of determining the redemption value of the redeemable participating Shares in the Portfolios, the investments held by the Portfolios are valued using amortised cost as a best estimate of fair value. Under FRS 102, in accounting for all of its financial instruments, an entity is required to apply either:

- (a) the full requirements of Sections 11 "Basic Financial Instruments" and Section 12 "Other Financial Instruments Issues" of FRS 102, or
- (b) the recognition and measurement provisions of International Accounting Standards 39 "Financial Instruments: Recognition and Measurement" ("IAS 39") as adopted for use in the European Union and the disclosure requirements of Sections 11 and 12, or
- (c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9 "Financial Instruments" and the disclosure requirements of Sections 11 and 12.

The Funds have availed of the exemption permitted to open-ended investment funds under FRS102, Section 7 "Statement of Cash Flows" not to prepare a cash flow statement.

Dividends, interest and capital gains received on investments made by the Funds may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Funds or its Shareholders.

(b) Foreign currency translation

(i) Functional and presentation currency

Items included in each Funds Financial Statements are measured using the currency of the primary economic environment in which it operates (the functional currency). This is the US Dollar (USD) for Invesco Asian Equity Fund, Invesco Global Select Equity Fund and Invesco Global Real Estate Securities Fund, Pounds Sterling (GBP) for the Invesco UK Equity Fund, Euro (EUR) for the Invesco Continental European Equity Fund and Japanese Yen (JPY) for Invesco Japanese Equity Core Fund. The USD, GBP, EUR and JPY are also the presentation currencies.

The Financial Statements are presented in the Funds' functional and presentation currency and rounded to the nearest whole number. They are prepared on the fair value basis for financial assets and financial liabilities at fair value through profit or loss and derivative financial instruments. Other financial assets and financial liabilities are stated at amortised cost or redemption amount (redeemable Shares).

(ii) Assets and liabilities in foreign currencies are translated into US Dollars, Pound Sterling, Euro and Japanese Yen at the rate of exchange ruling at the Statement of Financial Position date. Income and expenditure transactions are translated at the rates of exchange ruling at the date of the transactions.

The principal exchange rates used:

To determine the net asset value of each Fund for subscriptions and redemptions, investments have been valued based on the mid market prices at 12.00pm (Irish time) on the relevant trading day. For financial statements purposes, investments are valued based on mid market prices.

Notes to the Financial Statements (Continued)

For the six months ended 31 July 2017

2. UK Reporting

The offshore Funds (Tax) Regulations 2009 and Subsequent Regulations Amendments ('the Regulations') introduced new provisions to update offshore funds regime and came into effect for periods of accounting commencing after 1 December 2009. The Reporting Funds Regime requires:

1. the reporting fund status is applied for once and in advance.
2. the relevant Share Classes to report details of Income annually, within six months of their accounting year end to both Investors and UK authorities.
3. Investors to provide details of reportable income on their annual tax return.

The following Share Classes currently have UK Reporting status:

Fund	Classes
Invesco Asian Equity Fund	'A-AD', 'C-AD', 'C-Acc', 'Z-AD'
Invesco Continental European Equity Fund	'A-AD', 'C-AD'
Invesco Global Select Equity Fund	'A-AD', 'C-AD', 'Z-AD'
Invesco Japanese Equity Core Fund	'A-AD USD', 'C-AD', 'Z-AD (USD)', 'A-Acc GBP Hgd', 'C-Acc GBP Hgd'
Invesco UK Equity Fund	'A-AD', 'C-AD', 'Z-AD'
Invesco Global Real Estate Securities Fund	'A-AD', 'A-AD GBP', 'C-Acc', 'Z-AD'

The Statement of Reportable Income for the financial year end 31 January 2017 is available through the following Invesco Website:
www.invesco.com

3. Soft Commissions and Related Party Transactions

The Funds, (consistent with obtaining the best net result, including best execution), may enter into agreements with counterparties whereby those counterparties may make payments for investment services provided to the Funds.

Investment services are used by the Funds to improve or add to the services provided to its clients. Although each and every service may not be used to service each and every account managed by the Funds, the Directors of the Manager consider that those investment services received are, in the aggregate, of significant assistance in fulfilling its investment responsibilities and are of demonstrable benefit to all clients. Only services that in the view of the Directors of the Manager, assist in the provision of investment services to the Funds' clients will be paid for by counterparties.

Allowable investment services include services that provide assistance to the Funds in their investment performance. Those services include, but are not necessarily limited to, furnishing analysis, research and advisory services including economic factors and trends, portfolio valuation and analysis, performance measurement, market prices services and the use of specialised computer software and hardware or other information facilities.

The Funds will ensure adherence to the investment decision making responsibilities to its clients in accordance with the laws of the countries that have jurisdiction over their clients or business. This may vary in application with respect to the appropriateness of those investment services provided.

The Funds select counterparties to execute transactions on the basis that transactions will only be executed provided the placing of orders will not operate against the best interest of the Funds' clients and that the multiple is at a level which is generally accepted market practice. The Funds will endeavour to obtain best execution on all transactions for all clients.

In addition, clients may direct the Funds to pay commission to counterparties for products and services that would otherwise have to be paid for. In such cases, the commission is used for the exclusive benefit of the client whose transactions generated that commission.

The Manager, Administrator and Global Distributor ("Invesco Global Asset Management DAC") are deemed to be Related Parties under Financial Reporting Standard No. 102 (Related Party Disclosures). Fees charged, out of the Fund, by the Manager and Administrator are disclosed in the Income Statement on page 44. Amounts payable at the period end are disclosed in the Statement of Financial Position on page 41.

The Manager may pay a portion of its administration fees to the Sub-Administrator, in consideration for the Sub-Administrator providing certain administration functions to the Funds. Fees to the Global Distributor are paid from the Management fee.

The Manager, Invesco Global Asset Management DAC is a wholly owned subsidiary of Invesco UK Limited, which is a wholly owned subsidiary of Invesco Limited, the group parent company.

Director's fees were not paid from the Funds during the period under review. Directors fees were paid by Invesco Global Asset Management DAC.

There were no Director's holdings in the Funds for the period ended 31 July 2017 and year ended 31 January 2017.

Notes to the Financial Statements (Continued)

For the six months ended 31 July 2017

3. Soft Commissions and Related Party Transactions (continued)

Invesco UK Limited held a beneficial interest in the shares representing approximately the following percentages of the total number Shares in issue of the relevant fund class:

Seed Capital

Invesco UK Limited held the following redeemable participating Shares in the Funds and classes as detailed below:

	Number of Shares at the start of the Period	Number of Shares acquired in the Period	Number of Shares redeemed in the Period	Number of Shares at Period end	Percentage of Total Shares %

4. Fair Value Estimation

The Funds have adopted the Amendments to FRS 102 - "Fair Value Hierarchy Disclosures", which is effective for accounting periods beginning on or after 1 January 2017.

The fair value of financial assets and liabilities traded in active markets (such as publicly trading securities) are based on quoted market prices at 12:00pm (Irish Time) on 31 July 2017, 31 January 2017 and 29 July 2016 for Financial Statement purposes.

The quoted market price used for financial assets held by the Funds is the current mid price. The appropriate quoted market price for financial liabilities is the current asking price.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Notes to the Financial Statements (Continued)

For the six months ended 31 July 2017

4. Fair Value Estimation (continued)

The Funds are exposed to daily cash redemptions of redeemable Shares. They therefore invest the majority of their assets in investments that are traded in an active market and can be readily disposed of; they invest only a limited proportion of their assets in investments not actively traded on a recognised market.

For instruments for which there is no active market, the Funds may use internally developed models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. Valuation models are used primarily to value unlisted equity instruments for which markets were or have been inactive during the financial period. Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions. The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Funds hold. Valuations are therefore adjusted, where appropriate, to allow for additional factors including model risk, liquidity risk and counterparty risk.

The carrying value of other receivables and payables are assumed to approximate their fair values.

The Funds classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Directors of the Manager. The Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The level assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities. Because of the inherent uncertainties of valuation, the values reflected in the financial statements may materially differ from the value received upon actual sale of those investments.

The following tables analyse within the fair value hierarchy the Funds' financial assets and liabilities measured at fair value in accordance with FRS102 and FRED 62 Amendments to FRS 102 – Fair Value Hierarchy Disclosures.

31 July 2017

Invesco Asian Equity Fund	Level 1	Level 2	Level 3	Total

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities, debt securities and exchange traded derivatives. The Funds do not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include, investment-grade corporate bonds listed and over-the-counter derivatives. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently.

The Funds also consider original transaction price, recent transactions in the same or similar instruments and completed third-party transactions in comparable instruments. The Funds also consider other liquidity, credit and market risk factors. The Manager may, with the consent of the Depositary, adjust the model as deemed.

Within amounts held in The Bank of New York Mellon above \$8,212 on Invesco Asian Equity Fund, €131,641 on Invesco Continental European Equity Fund, \$4,564 on Invesco Global Select Equity Fund, ¥77,714,199 on Invesco Japanese Equity Core Fund, £152,561 on Invesco UK Equity Fund and \$474 on Invesco Global Real Estate Securities Fund are included as an unsecured bank overdraft.

6. Umbrella Cash Collection Accounts

The Investor Money Regulations 2015 for Fund Service Providers (the "Investor Money Regulations" or "IMR") established under the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)), requires the Series to channel subscription, distribution and redemption monies through an Investors Money Collection Account. As a result subscription and redemption monies will be channeled through an umbrella cash collection account in the name of the Series and, in respect of any sub-funds considered to be highly leveraged, sub-fund cash collection accounts in the name of the relevant sub-fund(s). Pending issue of the Shares and / or payment of subscription proceeds to an account in the name of the Series or the relevant Funds, and pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the relevant Fund in respect of amounts paid by or due to it. For the avoidance of doubt the Funds of the Series are not considered highly leveraged.

10. Efficient Portfolio Management

Forward foreign currency exchange contracts may be used to hedge against anticipated future changes in exchange rates which otherwise might either adversely affect the value of the Funds' portfolio securities or adversely affect the price of securities which the Fund intends to purchase at a later date. Forward Currency contracts are fair valued at the prevailing forward rate at the reporting date. The resulting unrealised gains and losses for the period are included in the Statement of Financial Position and the Income Statement. Realised gains or losses on maturity are presented in the Income Statement.

The Funds may also utilise futures and options for efficient portfolio management or hedging purposes under the conditions and within the limits laid down by the Central Bank and, if more restrictive, the Hong Kong Securities and Futures Commission (SFC).

Details of Forward Foreign currency exchange contracts are reflected within the Portfolio Statements on pages 9, 26, 31 and 39.

11. Significant Events During the Period

Invesco Asian Equity Fund 'S-Acc' Shares was launched on 23 February 2017.

Invesco Asian Equity Fund 'I-Acc' Shares was liquidated on 23 February 2017.

An updated Consolidated Prospectus was issued on 15 February 2017.

Effective 10 May 2017 the Actual Annual Administration Fee for the following share classes was reduced by 10 basis points:

Invesco Asian Equity Fund Z-Acc EUR share class

Invesco Asian Equity Fund Z-AD USD share class

Invesco Global Select Equity Fund Z-AD USD share class

Invesco Japanese Equity Core Fund Z-Acc EUR share class

Invesco Japanese Equity Core Fund Z-AD USD share class

Invesco UK Equity Fund Z-AD GBP share class

There were no other significant events during the period ended 31 July 2017.

12. Subsequent Events

Invesco Asian Equity Fund R-Acc USD shares was launched on 16 August 2017.

Invesco Asian Equity Fund Z-Acc USD shares was launched on 16 August 2017.

There were no other subsequent events since the period ended 31 July 2017 that could have an effect on these Financial Statements.

13. Approval of Financial Statements

The financial statements were approved by the Directors of the Manager on 19 September 2017.

Statement of the Manager's and Trustee's Responsibilities

The Manager is required under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations") (as amended), to prepare Financial Statements for each financial period reporting the financial position of each Fund in the Invesco Funds Series (the "Series") as at the end of the accounting period and of its income/excess of expenditure over income for the period. In preparing those Financial Statements, the Manager:

- ensures that the Financial Statements comply with the Trust Deed and FRS 102 applicable accounting standards subject to any material departures which are disclosed and explained in the Financial Statements;
- selects suitable accounting policies and then applies them consistently;
- makes judgements and estimates that are reasonable and prudent;
- prepares the Financial Statements on the going concern basis unless it is inappropriate to presume that the Series will continue in operation; and
- is responsible for taking reasonable steps for the prevention and detection of fraud, error, or non-compliance with laws or the UCITS Regulations, and other irregularities.

The Manager is required to keep proper accounting records and to manage the Series in accordance with the UCITS Regulations, the Hong Kong Code on Unit Trusts, Mutual Funds and the Trust Deed.

The Directors of the Manager of the Series are responsible for the maintenance and integrity of the information related to the Series on the Invesco website. Information on the internet is accessible in many countries with different legal requirements. Legislation in Ireland governing the preparation and dissemination of Financial Statements may differ from legislation in other jurisdictions.

The Directors of the Manager are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 are applied to all transactions with connected persons. All transactions with connected persons are at arms' length.

The Directors of the Manager are satisfied that transactions with connected parties entered into during the period complied with the obligations set out in the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015. A connected person is defined as the promoter, manager, depositary, investment adviser and/or associated or group companies of these.

The Depositary is required under the UCITS Regulations to:

1. ensure that the sale, issue, repurchase, redemption and cancellation of Shares effected by or on behalf of the Funds are carried out in accordance with the UCITS Regulations and in accordance with the Trust Deed.
2. ensure that the value of shares is calculated in accordance with the UCITS Regulations and the Trust Deed.
3. carry out the instructions of the Manager unless they conflict with the UCITS Regulations or the Trust Deed.
4. ensure that where transactions involve the Funds' assets, any consideration is remitted to the Fund within time limits which are acceptable market practice in the context of such a transaction.
5. ensure that the Funds' income is applied in accordance with the UCITS Regulations and the Trust Deed.
6. enquire into the conduct of the Manager in each annual accounting period and report thereon to the Shareholders. The Depositary's report shall be delivered to the Manager in good time to enable the Manager to include a copy of the report in its Annual Report. The Depositary's Report shall state whether in the Depositary's opinion the Funds have been managed in that period:
 - (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and Depositary by the Trust Deed and the UCITS Regulations; and
 - (ii) otherwise in accordance with the provisions of the Trust Deed and the UCITS Regulations.

If the Manager does not comply with (i) or (ii) above, the Depositary must state why this is the case and outline the steps which the Depositary has taken to rectify the situation.

The Depositary must notify the Central Bank of Ireland promptly of any material breach of the UCITS Regulations, conditions imposed by the Central Bank of Ireland or provisions of the prospectus with regard to the Fund.

The duties provided for above may not be delegated by the Depositary to a third party. These duties must be carried out in the State.

The Depositary also takes into its custody or under its control all the assets of the Funds and holds them in safekeeping for the Shareholders. The Depositary will provide record keeping and ownership verification services in respect of assets of the Trust not held in custody in accordance with the provisions of the UCITS Directive and the UCITS Regulations. The Depositary will also provide cash monitoring services in respect of each Fund's cash flows and subscriptions.

Additional Information

1. Remuneration Policy

The Manager (“Invesco Global Asset Management DAC”) adopted on 18 March 2016 a revised remuneration policy which is consistent with the new remuneration principles applicable to UCITS management companies. Its purpose is to ensure that the remuneration of the staff of the Manager is consistent with and promote sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of itself and the UCITS it manages (including the Fund) and does not impair the Manager’s compliance with its duty to act in the best interests of the UCITS it manages. Further information is available in the Manager’s UCITS Remuneration Policy document which can be obtained from the website of the Manager (www.invescomanagementcompany.ie). A copy may be obtained, free of charge, at the registered office of the Manager.

The rules require the Manager to disclose in the Fund’s annual report, certain quantitative disclosures concerning the Manager’s remuneration policy, including:

- the total and aggregate amount of remuneration paid by the Manager to its staff (including any amounts paid directly by the Fund);
- the number of beneficiaries;
- a description of how the remuneration and benefits have been calculated; and
- certain information regarding the Manager’s oversight of its remuneration policy and details of any changes to the Manager’s remuneration policies since the previous annual report.

However, as noted above, the revised policy has been in place for less than a full performance period. Consequently, in accordance with the relevant rules, the aforementioned disclosures are not included in this report as the available partial-year information would not provide materially relevant, reliable, comparable and clear information to investors. The Manager will disclose the quantitative UCITS remuneration data in the next annual report for the Fund where information for a full performance year will be available.

2. Securities Financing Transactions Regulation:

As at 31 July 2017 and 31 January 2017, the aggregate value of securities on loan from the Funds and the value of collateral held by the Funds in respect of these securities is Nil.
